

New Film: Fluoridegate - An American Tragedy

- February 2013 Fluoride Free Sacramento

The new documentary film by Dr. David Kennedy is called FluorideGate - An American Tragedy. The film exposes the sordid truth about water fluoridation, and it has nothing to do with promoting dental health. Fluoridegate places particular focus on how water fluoridation can harm young children & minorities, as they tend to suffer the greatest health effects.

The film is packed with powerful testimonies from key insiders privy to how fluoride became an integral part of water treatment policy, and how the public was manipulated into accepting this forced medication. It also includes background information on why minorities are more susceptible to harm from water fluoridation due to their bodies' greater absorption of toxic lead and arsenic.

We learn how a combination of mercury from vaccines etc. and the lead from water fluoridation and its effects on plumbing puts our infant mortality rate at 46%. This equates to approximately 18,000 children dying annually due to this toxic drug policy.

Civil Rights Leaders Call for Halt to Water Fluoridation

- April 14, 2011 Fluoride Action Network

Because fluoride can disproportionately harm poor citizens and black families, Atlanta civil rights leaders, Andrew Young and Dr. Gerald Durley, have asked Georgia legislators to repeal the state's mandatory water fluoridation law.

Andrew Young, former U.N. Ambassador and former Atlanta Mayor, along with Reverend Dr. Gerald Durley, Pastor of Providence Baptist Church in Atlanta, both inductees in the International Civil Rights Walk of Fame, expressed concerns about the fairness, safety, and full disclosure regarding fluoridation in letters to the state's minority and majority legislative leaders. Studies show that despite fluoridation, tooth decay is higher in blacks along with fluoride overexposure symptoms - dental fluorosis or discolored teeth. More at: FluorideFreeSacramento.org

National Hispanic Civil Rights Organization Votes To Oppose Water Fluoridation

- September 14, 2011 The Lillie Center, Inc.

In an action with far-reaching national ramifications, the League of United Latin American Citizens (LULAC), the oldest Hispanic civil rights organization in the United States, has adopted a resolution opposing the practice of water fluoridation.

"The Hispanic community is no longer going to be silent on this issue," says Henry Rodriguez, LULAC's Texas civil rights chairman. "This is about forcing us to be medicated through our drinking water without our consent or full disclosure of the risks."

"Fluoridation is a civil rights violation," he says. "Opposition to fluoridation is going to continue building and there is no stopping it. There are millions of Hispanics and other minorities in the U.S. who don't have the funds to avoid fluoridated water for making their babies' milk formula. And millions of families don't know they're being medicated in their drinking water, or about possible risks for kidney patients and diabetics." ... continue reading at: www.FluorideFreeSacramento.org

Sacramento Leaders Ignore Reality of Fluoridation

- April 2013 Fluoride Free Sacramento

As cities reject water fluoridation worldwide, Sacramento leaders refuse hear or acknowledge experts. Council members have turned down meetings with fluoride experts, relying instead on local dentists & industry lobbyists without toxicology training. Since fluoridation began here, citizens have asked for informed consent. Members of Fluoride Free Sacramento believe it is time to halt to Water Fluoridation. What do you think Sacramento? Remember, you are drinking it right now.

Top 20 Fluoride News Stories of 2011

- February 2012 New York State Coalition Opposed to Fluoridation, Inc

Misinformed fluoridation promoters falsely assure unquestioning and confused legislators that fluoride-laced water is safe for everyone and no credible evidence proves otherwise. However, hundreds of studies and an abundance of evidence prove them wrong. Here's what happened in 2011:

- 1) U.S. Department of Health and Human Services (HHS) recommends lowering water fluoride levels due to fluoride's harmful dental effects.
- 2) HHS recommends avoiding fluoridated water when making infant formula to prevent dental fluorosis (discolored teeth)
- 3) The Environmental Protection Agency (EPA) will lower safe water fluoride levels to protect bones and teeth
- 4) U.S. Centers for Disease Control (CDC) reports growing numbers of U.S. children have fluoride-damaged teeth, arguably at epidemic proportions.
- 5) Fumigant sulfuryl fluoride found to leave health-damaging levels of fluoride residues on food
- 6) Fluoride-seller, Colgate, reports that studies confirm "the association between infant formula consumption and permanent dentition fluorosis."
- 7) Infant juices found to contain non-labeled tooth-damaging fluoride levels
- 8) More studies published linking fluoride to human brain damage and lower IQ
- 9) New study fails to refute fluoride-osteosarcoma (cancer) link
- 10) Prominent Hispanic civil rights group opposes fluoridation

PROFESSIONALS' STATEMENT

Calling for an End to Water Fluoridation

"It is time for the US, and the few remaining fluoridating countries, to recognize that fluoridation is outdated, has serious risks that far outweigh any minor benefits, violates sound medical ethics and denies freedom of choice. Fluoridation must be ended now."

Signed by over 4,000 medical, science, and environmental health professionals as of Feb. 2012.
